AUDITORS' REPORT ON SCHEDULES OF COMPOSITE PERFORMANCE RESULTS

To the Directors of New Brunswick Investment Management Corporation

We have examined whether New Brunswick Investment Management Corporation complied with the composite construction requirements of the CFA Institute's Global Investment Performance Standards ("GIPS") on a firm-wide basis for the ten years ended March 31, 2009, and whether the Corporation designed its processes and procedures to calculate and present performance results in compliance with the GIPS as of March 31, 2009. We have also examined the accompanying schedule of composite performance results for total funds under management for the ten years ended March 31, 2009 and the following supplemental schedules of composite performance results for the ten years ended March 31, 2009 (collectively, the "Schedules"):

- Public Service Superannuation Fund
- Teachers' Pension Fund
- Judges' Superannuation Fund

The Corporation's management is responsible for compliance with the GIPS, for the design of its processes and procedures, and for the accompanying Schedules. Our responsibility is to express an opinion based on our examination.

Our examination was conducted in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the corporation has complied with the GIPS. Accordingly, our audit included examining, on a test basis, the evidence supporting the Corporation's processes and procedures referred to above, and performing the procedures for verification as set forth by the GIPS, including procedures for a focused performance examination, as well as such other procedures as we considered necessary in the circumstances.

In our opinion, the Corporation has, in all material respects:

- Complied with the composite construction requirements of the GIPS on a firm-wide basis for the ten years ended March 31, 2009; and
- Designed its processes and procedures to calculate and present performance results in compliance with the GIPS as of March 31, 2009.

Page 2

Also, in our opinion, the accompanying Schedules are presented, in all material respects, in conformity with the GIPS.

This report does not relate to any composite presentation of the Corporation other than the accompanying Schedules.

NEW BRUNSWICK INVESTMENT MANAGEMENT CORPORATION

Notes to Schedules of Composite Performance Results

Ten years ended March 31, 2009

1. Operations:

New Brunswick Investment Management Corporation ("NBIMC") is a Crown corporation of the Province of New Brunswick. NBIMC was appointed as trustee, on March 11, 1996 by an Act of the New Brunswick Legislature, and assumed responsibility for the management of the assets of the Public Service Superannuation Fund, the Teachers' Pension Fund and the Judges' Superannuation Fund (collectively, the "Funds" and individually, the "Fund") effective April 1, 1996. On April 1, 1998, the assets of the Funds were transferred to unit trust funds established by NBIMC to facilitate the collective investment management and administration of the assets. Effective April 1, 2008, separate unit trust funds were created to conduct foreign exchange hedging on behalf of each Fund, according to its investment policy. These foreign currency hedging overlay portfolios are passive in nature and do not attempt to profit from tactical foreign exchange views. At March 31, 2009, there were 22 unit trust funds in operation, each with a specific investment mandate. Each of the Funds holds units of the unit trust funds in accordance with the investment policy of the respective Fund.

2. Compliance Statement

NBIMC has prepared and presented this report in compliance with the Global Investment Performance Standards (GIPS®).

3. Composites

The schedule of composite performance presented and the supplemental schedules of composite performance reflecting the Funds represent all of NBIMC's Composites.

Schedule of Composite Performance Results - Total Funds Under Management:

The attached schedule of composite performance results presents the performance results of total funds under management from April 1, 1999 to March 31, 2009. All portfolios managed by NBIMC are included in this single composite.

NEW BRUNSWICK INVESTMENT MANAGEMENT CORPORATION

Notes to Schedules of Composite Performance Results

Ten years ended March 31, 2009

3. Composites:

Supplemental Schedules:

The supplemental schedules of composite performance results by asset class of each respective Fund present the performance results from April 1, 1999 to March 31, 2009.

4. Calculation of Composite Investment Performance Results:

- (a) The investment performance for the Funds has been calculated on a time-weighted basis using daily valuations and geometric linking of daily returns. Composite returns are calculated based on geometric linking of monthly returns, which are asset-weighted using beginning of month asset values.
- (b) Performance returns are calculated using trade-date accounting.
- (c) The composites include all fee paying, discretionary accounts managed by NBIMC.
- (d) Performance returns are calculated on an accrual basis, which include all dividends, net of withholding taxes, interest (including interest income from short term cash investments) and realized and unrealized gains and losses as of the last business day of the fiscal year. The returns reflect the cost of brokerage commissions on completed transactions. Performance returns are computed in Canadian dollars.

Additional information regarding NBIMC's policies and procedures for calculating and reporting performance results is available upon request.

Foreign Currency Hedging Overlay	Foreign Currency Hedging Overlay Portfolio		

[†] Effective April 1, 2008, Canadian dollar benchmarks were implemented for international exposure, in conjunction with a foreign exposure hedging overlay strategy for each Fund. The benchmark return for the passive FX hedging overlay asset class is equal to actual returns because the strategy does not attempt to profit from tactical foreign exchange views. The MSCI EAFE benchmark replaced MSCI Europe and the Nikkei 225; and the S&P500 replaced the Russell 2000.

^{††} Effective November 6, 2007 the TSX Inc renamed the Scotia McLeod bond benchmark Index to the DEX All Government Bond Index, the ScotiaMcLeod 91-day T-Bill Index to the DEX 91-day T-Bill Index, and the ScotiaMcLeod Real Return Bond Index to the DEX Real Return Bond Index.

^{†††} Effective March 19, 2007 the S&P/TSX MidCap and SmallCap index benchmarks were replaced with the S&P/TSX Completion Index following S&P's announcement that the S&P/TSX SmallCap Index would be separate from the S&P/TSX Composite Index. The S&P/TSX Completion Index contains the remaining constituents of the S&P/TSX Composite Index.

[†] Effective December 19, 2005 the S&P/TSX Composite was replaced as a benchmark by the S&P/TSX Equity index due to the planned introduction of income trust securities into the composite Index. Effective January 2007, the S&P/TSX Equity Index was replaced as a benchmark by the S&P/TSX Composite Index following completion of extensive research regarding income trusts as a component of this index and due to the decline in the composition of the companies making up the Equity only index.

32.0% S&P 500	8.0% Russell 2000	20.0% Nikkei 225	10.0% FTSE-100
10.0% CAC-40	10.0% DAX	10.0% MIB-30	

NEW BRUNSWICK INVESTMENT MANAGEMENT CORPORATION

Notes to Schedules of Composite Performance Results

Ten years ended March 31, 2009

4. Calculation of Composite Investment Performance Results (continued):

- (f) Asset class returns include returns from cash and cash equivalents, which are held within each asset class segment of the respective Fund. The Chief Investment Officer of NBIMC sets asset class weightings for each Fund, within tolerances established in the investment policies set by the Board of Directors of NBIMC.
- (g) The dispersion of the performance returns is measured by the range between the highest and lowest performing portfolio in the composite.
- (h) The composite performance presented in these schedules may not be indicative of future performance. Readers should also be aware that other performance calculation methods may produce different results, and that the results for specific accounts and for different periods may vary from composite returns presented. Comparisons of investment results should consider qualitative circumstances and should be made only to portfolios with generally similar objectives. In calculating the composite performance, no adjustments were made for income taxes, management fees, custodial fees or Fund expenses.
- (i) In the calculation and presentation of performance returns, NBIMC is not aware of any instances in which this presentation does not conform with the laws and regulations of any province or territory of Canada in which NBIMC operates.

5. Derivative instruments:

Futures contracts, forward foreign exchange contracts, exchange traded and over-the-counter options and swaps are used to a significant extent in investment management activities within each Fund.

These derivative instruments are used for various purposes, including:

- to simulate an investment in a particular stock market, but with lower transaction costs;
- to enhance performance returns;
- to modify the cash flow characteristics of an investment; or
- to hedge against potential losses due to changes in foreign exchange rates or stock prices.

In using derivative instruments, as described above, NBIMC has established investment criteria, policies and procedures over the extent and use of derivative instruments to manage performance returns and mitigate market risk, credit risk, foreign currency risk and interest rate risk factors.

Notes to Schedules of Composite Performance Results

Ten years ended March 31, 2009

6. Investment management fees:

Results are presented prior to the deduction of investment management fees, but after the deduction of brokerage commissions and applicable withholding taxes. GIPS® require that fee levels be disclosed together with the accompanying schedules of composite performance results so that readers may measure the effect of fees on returns achieved.

Under the authority of the Act, NBIMC recovers its expenses from the Funds under its trusteeship.

NBIMC does not have a standard management fee schedule. The following summarizes the actual expenses charged for the assets under management for the preceding ten years:

Year ended	Expenses \$ (in thousands)	Assets under management, Average for the Period \$ (in thousands)	Expense (in basis points)
March 31, 2009	11,480	7,859,875	14.6
March 31, 2008	12,589	8,698,211	14.5
March 31, 2007	11,283	8,399,321	13.4
March 31, 2006	8,998	7,567,806	12.0
March 31, 2005	8,848	6,801,052	13.0
March 31, 2004	9,003	5,917,778	15.0
March 31, 2003	7,458	5,550,958	13.5
March 31, 2002	6,570	5,808,526	11.3
March 31, 2001	5,820	5,998,941	9.2
March 31, 2000	4,620	5,679,356	8.1

7. Sub-advisors:

NBIMC enters into sub-advisory agreements whereby certain assets included in the equity and alternative asset classes are managed by sub-advisors. Rates of return earned on assets managed by the sub-advisors are included in NBIMC's composite presentations because NBIMC maintains full discretion over the use and choice of sub-advisors.
