## **Profile Introduction**

The following Vestcor Investment Entity Profiles are supplied to clients by Vestcor Investment Management Corporation (VIMC) to provide an overall description, set of operating characteristics, and applicable investment guidelines for each VIMC pooled investment fund. Management retains the right from time to time to set more restrictive operating guidelines, in the best interests of the fund, as part of their internal Investment Procedures Manual.

It is understood by each VIMC client that they may be invested in one or more funds, each of which is governed by its own specific terms and guidelines as provided in this document. Each client must satisfy themselves through a review of this document that the funds in which they invest are generally consistent with their own investment policy requirements.

### **Pooled Fund Structure**

The Vestcor Investment Entities (the “pooled funds”), consisting of unit trust funds and limited partnerships are used by VIMC to provide the specific asset class exposure needed to fulfill each client’s specific Investment Policy requirements. These pooled funds can typically be accessed by clients based on their daily closing asset value; however, management may limit or restrict amounts from time to time based on market conditions. In cases where it is considered that a specific client redemption or contribution may negatively impact the net asset value (i.e., excessive trading or liquidity costs), management may isolate the actual transaction costs and recover those costs from the client that generated the activity or may use a segregated transition account for such activity to ensure fair treatment among all clients.

In some cases, separate but similar pooled funds are provided by VIMC to address specific client income tax circumstances and for cost efficiency purposes. These pooled funds may differ somewhat from the standard pooled funds in terms of their holdings and actions.

### **Pooled Fund Costs**

Expenses that relate directly to the operations of the pooled funds are charged to the pooled funds.

Pooled funds may incur three major types of costs:

1. Transactional costs – includes direct costs of trading securities such as broker commissions and applicable market fees and taxes.
2. Fund operations – includes borrowing fees which may be offset with securities lending revenue, foreign withholding taxes, banking charges, and professional fees.
3. Private asset costs – include additional costs related to the initiation of investments, including legal costs, and management of limited partnership, joint venture and co-investment structures.

At its sole discretion, VIMC may allocate the estimated impact incurred by a fund that is related to contributing or redeeming unitholders, to alleviate the impact of purchases and redemptions to unit holders not participating.

---

**Leverage**

VIMC does not engage in short term borrowing to increase the market exposure of any pooled funds via leveraged positions. Minor leverage may occur from time to time due to operational purposes (i.e. cash management). Certain pooled funds, as may be indicated in their profile, may also invest in both long and short security positions (including both physical securities and derivatives) and so the notional exposure of a pooled fund may not necessarily be the same as its market value. It is important to note that leverage can take on complex subtleties that depend on the specific investment context.

**Disclaimer**

This document has been updated as of March 27, 2017 and is provided for informational purposes only. Information contained herein is subject to change and will be updated periodically as conditions warrant.

Please note that return and risk information are based on long-term expectations and should not be considered as a guarantee of future results.

## NBIMC Asset Mix Strategy Fund Profile

Fund Information	
Effective date of profile	March 27, 2017

Return objective versus benchmark	350 basis points over benchmark on a four-year moving average
Expected active risk (standard deviation)	Approximately 6-8% annualized on a four-year moving average
Investments	This fund invests primarily in equities listed on an exchange or otherwise domiciled in either the U.S. or Canada, but may also use other investments such as exchange traded funds, listed or OTC derivatives, or other securities to allow the fund to achieve its return target or manage risk. Favored securities are held long with offsetting positions held short to achieve approximate market neutrality.
Cash and NBIMC Money Market Fund	Small amounts of cash may be held; money market securities permitted
Credit quality for money market	As per NBIMC Money Market Fund
Credit quality for bonds	n/a
Currency exposure	Fund may be unhedged and exposed to foreign currency fluctuations
Sector weights	n/a
Security weights	Individual security weights limited to 10% of the fund, exposure in related securities are netted
Use of derivatives	Permitted to replicate securities or strategies that are consistent with the fund's investment objective; foreign currency futures or forward contracts permitted
Use of leverage	Fund may be both long and short securities (both physical securities and derivative contracts) for investment or risk management purposes, and as such, the gross market exposure may be larger than the net market exposure of the fund.
