Monthly Pension Benefit Estimate (Service Earned to December 31, 2017)

The estimates shown are calculated using all service earned up to December 31, 2017. **The estimates take into account the 1.47% Cost of Living Adjustment (COLA) that was awarded on January 1, 2018.** Please refer to the **"Online Calculator Tool Benefit Information"** section for information regarding calculating pension estimates with projected service.

The following pension estimates (gross amounts before taxes and deductions) are provided as at December 31, 2017:

Pension at January 1, 2018: If you are over the age of 55 as at December 31, 2017, this estimate provides you the pension amount that would have been payable on January 1, 2018.

Earliest Retirement Age: If you are under the age of 55 as at December 31, 2017, this estimate assumes that you defer commencement of your pension until age 55.

Pension after Age 65: If you are under the age of 65 as at December 31, 2017, this estimate assumes that you defer commencement of your pension until age 65.

As your pension is integrated with the Canada Pension Plan (CPP) at age 65, two rows of pension amounts ("Until 65" and "After 65") will be provided (if you are under age 65 at the end of the statement period) to show the pension amounts before and after integration with the CPP.
